With Metro Rewards, it really pays to rideshare. We'll pay your employees to share the ride!

Here's how:

NICE!

- > Eligible employees* receive a **\$15 giftcard** good at The Coffee Bean & Tea Leaf
- > Metro Rewards participants are entered into monthly and quarterly drawings for **\$100 giftcards**
- > Metro Rewards is renewable annually as long as participants continue to rideshare

* To qualify, employees must work at a participating worksite, rideshare at least eight workdays a month for three months or longer and must complete a Metro Rewards application.

Metro Rewards is a great way to provide an employee rideshare incentive at no cost to your company or employees.

So, sign your company up now! Just talk to your Metro Rewards representative to get all the details.

**Call Metro Commute Services
at 213.922.2811.**

“Your incentive program takes very little of my time and our employees are very happy. When participating employees receive giftcards, their co-workers want to find out more about the program so they can participate too!”

Andres Vasquez

St. Johns Medical Center

“You have a great program, and the employees have certainly enjoyed the ‘envelopes’ they received. So many of them carpool now, it seems ingrained. What a good thing!”

Janet Hoffman

Haldeman, Inc.

“I just wanted to thank you for the giftcards. Our rideshare employees who received them were really happy and very appreciative.”

Eva Mihalka

Jones Day – Los Angeles

“Your incentive program is the perfect vehicle to assist us in meeting the challenge of putting people in a position to rideshare so they see the rewards for themselves. Coordinating and managing this program requires little effort and the materials you have are great.”

Raphael Guillen

City of Pico Rivera

“As an Employee Transportation Coordinator for a large multi-tenant office complex, it can be difficult to get the rideshare message to tenants. The giftcards have really made a difference in getting employees to share the ride to work. Your program has helped us improve our AVR.”

Cristina Corrales

Howard Hughes Center
